

Informa Tech Automotive Group Pivots Automotive Tech: Megatrends to Online Series

December 30, 2021 – LAS VEGAS, NV - Automotive Tech: Megatrends (January 4th) has been canceled amid concerns for the health and safety of staff, attendees, speakers, and sponsors. Due to rising COVID cases and the prevalence of the Omicron variant, Informa Tech Automotive Group has made the decision to cancel the in-person edition of Automotive Tech: Megatrends.

The Jan. 4th conference offered automotive tech executives an opportunity to focus their time on the key trends impacting the automotive industry in 2022 and beyond, during the week of CES. To ensure that we continue to deliver this much-anticipated learning and networking, Informa Tech Automotive Group has adapted Automotive Tech: Megatrends (formerly known as Consumer Telematics Show) into an online-only series of keynote conversations and panel discussions, led by industry leaders set to take place in January and February 2022.

This online series will feature a line-up of senior executives and automotive innovators discussing how the 2022 Megatrends of **Electrification, Consumer Personalization, Software-Defined Vehicle, and Autonomous Future** are set to change the shape of the auto tech industry in 2022 and beyond.

Registration for the series will open in early January. Stay informed by visiting:
<https://wardsauto.informa.com/automotive-tech-week-megatrends/>

For sponsors, exhibitors, attendees, and speakers for the in-person January event, we've been in touch via email to share more information about how to join the Online Series. Can't find the email? Then please reach out to Freya.Smale@informa.com who will direct your enquiry.

ABOUT INFORMA TECH AUTOMOTIVE GROUP

Connecting the automotive and technology ecosystem to inform, inspire and accelerate a brighter future.

Combining the research expertise of Wards Intelligence, the reach and community of WardsAuto, and the connection and event power of TU-Automotive, our trusted brand pillars provide expert direction into automotive and technology with unrivaled opportunities to develop and differentiate your company's position within it.
